- MoD Ref: 50485

Details

Warthog Armoured All Terrain Repair Recovery Vehicle (RRV)

The Repair Recovery Variant (RRV) is to serve as a mobile heavy aid workshop to facilitate repairs and maintenance in the field. The RRV consists of a typical front cabin configuration and a flat bed rear cabin.

Onboard equipment on the flatbed consists of a Palfinger 6mT crane mounted on a subframe. The RRV is also equipped with a constant pull winch which is capable of providing a maximum 10T pulling force. The subframe carries a pair of anchor spades which help to support the vehicle during lifting or winching operations. A 23 CFM air compressor with 2 hose reels is also provided to allow power tools to be used. Finally a workbench and vice unit and storage units are carried to facilitate maintenance tasks to be carried out.

In addition a Hatz engine is included to provide both electrical power and hydraulic power to various subsystems.
